To whom it may concern,

I am interested in becoming a neurosurgeon for Johns Hopkins Hospital. Dr. Boockvar from the Department of Neurosurgery in Lenox Hill Hospital recommended that I contact you.

I am writing to you because I am applying for a position as a neurosurgeon. I have studied and analyzed the brain and nervous system. I am interested in neurosurgery because I have always found these studies fascinating. I have excellent hand-eye coordination, attention to detail, organizational skills, an understanding of human anatomy, suturing skills, and steady hands. My goal is to secure a position as a neurosurgeon within the Johns Hopkins Neurosurgery Department. I am currently enrolled in medical terminology and honors biology. In these classes, I learn about human anatomy and physiology, which are primary aspects of my education that support my knowledge for this job. Currently, I am working as an aesthetic coordinator for URenewed Medical Clinic. This job teaches me communication skills and collaboration with patients. I am also a member of the Congress of Future Medical Leaders. This honors program provides me with mentorship opportunities from outstanding leaders in the world of medicine.

I am available for an interview at your convenience. I look forward to following up with you and learning more about my career choice.

Sincerely,

Ava Brocchini
