

## Elder Project Completion

After presenting my project to the class, I started working on my community service project. I decided to focus on one organization in Ripon instead of multiple because the Ripon Chamber of Commerce stood out the most. They do so much for this community that is not recognized, so I wanted to show them gratitude. I went to a store in Modesto that makes gift baskets and bought four for the girls who run the chamber. After getting the baskets, I delivered them to the girls the following day. They were not all there, but they were grateful for the gifts, and it was nice to show them appreciation for all they do
